Quick Heal
Total Security

Secured | Accessible | Future-Ready | Empowered

Quick Heal's Next-Generation Cyber Security Solutions are powered by GoDeep.AI

GoDeep.AI is a cutting-edge malware-hunting technology powered by Artificial Intelligence.

Our **Deep Learning Module** learns and remembers every historical malware threat and stores the learnings in a centralized cloud. It feeds the **Artificial Intelligence algorithm** to learn and evolve in real-time, providing the engine with the capabilities of **Predictive Detection.**

This algorithm works conjointly with **Behavioral Detection technology** that monitors and tracks the activities of each program. This technology further blocks the program immediately if its behavior is found suspicious. GoDeep.AI, with its advanced technology, protects users from threats that have never occurred before **Zero Day attacks**.

Digital Safety
with Quick Heal Total Security
Key Features

- Security & Privacy Score
- Data Breach Alert
- Safe Banking
- Smart Parenting
- Anti-Tracker

Key Benefits

- Real-time threat protection
- Privacy & Identity protection
- Enhanced web protection
- Secured online transactions
- Lightweight on computer

Product Highlights

Digital Safety Made Easy

Security Score

- Provides insight on your risk situation and security status along with helpful tips for enhancing device security.

Privacy Score

- Offers insights into your personal data risks and gives useful tips to strengthen and protect your privacy and identity in the digital world.

Intuitive Workflows and Reports

- Get real time, easy-to-understand visual snapshots of your digital wellbeing reports, along with recommendations to improve your digital safety and online privacy.

Be vigilant against leakage of personal data

Data Breach Alert

- Helps you check if your personal data such as your name, email address, phone no., IP address etc. has ever been leaked by any websites or hacked online. It also recommends appropriate actions to prevent possible data breach.

Prevent ransomware attempts

Ransomware Protection

- Takes a backup of your data on regular basis, so if there is any ransomware attack, you can remove ransomware and restore your data without getting affected.

Surf the Internet safely

Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

Phishing Protection

- Detects frivolous and phishing attempts instantly that try to steal your data in disguise. You never fall prey to data phishing.

Pay bills, transfer money online, and do banking without fear

Safe Banking

- Protects your credentials including bank account, username, and password during banking transactions and online shopping from getting stolen.

Keep trackers of your digital footprints at bay

Anti-Tracker

- When you go online, there are trackers that pry on your online footprint and browsing behavior. Trackers use such data to promote marketing or sales, display ads, share or sell personal information to different companies. You may not like to be tracked. Anti-Tracker blocks the trackers that collect your footprints whenever you browse online.

Stop espionage by webcam

Webcam Protection

- Detects and prevents applications and malwares from accessing the webcam of your PC without your consent to compromise your privacy.

Suppress distraction and concentrate on games

Game Booster

- Allows you to enjoy playing games on PC smoothly and faster without any interruptions from other applications.

Restrict inappropriate websites for your children

Smart Parenting

- Makes Internet a healthy platform for your children. Regulates your children's access to the Internet and blocks websites and apps with inappropriate and offensive content to protect them from online threats. Their safety is in your hands.

Stay protected with robust scan engine

Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal your data.

Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to infect your PC from various sources and removes them instantly.
