Protection simplified

Your ultimate **Privacy** is here.

Leaked Aadhaar, or other critical documents on the Dark Web can drain your bank account, ruin your credit score, or be misused for crimes in your name. To stop such threats, you need protection that monitors the Dark Web and blocks hidden trackers before they exploit your data.

Quick Heal safeguards your privacy with
two powerful protections

Dark Web Monitoring 2.0

Scans hidden forums for leaked data like Phone numbers, Emails, Passwords, Passport, Pan cards, & Aadhaar. Sends **real-time alerts**, provides a **risk score with breach count**, and guides you with **corrective actions**.

Spy Alert

Detects and blocks hidden trackers, including analytics, social media, advertising, and miscellaneous trackers, preventing profiling and misuse of your personal data, Keeping your online footprints private.

Together, they give you **visibility into hidden risks** and **real-time defense** against identity theft and online tracking.

Quick Heal's Next-Gen Cyber Security Solutions are powered by **GoDeep.AI**
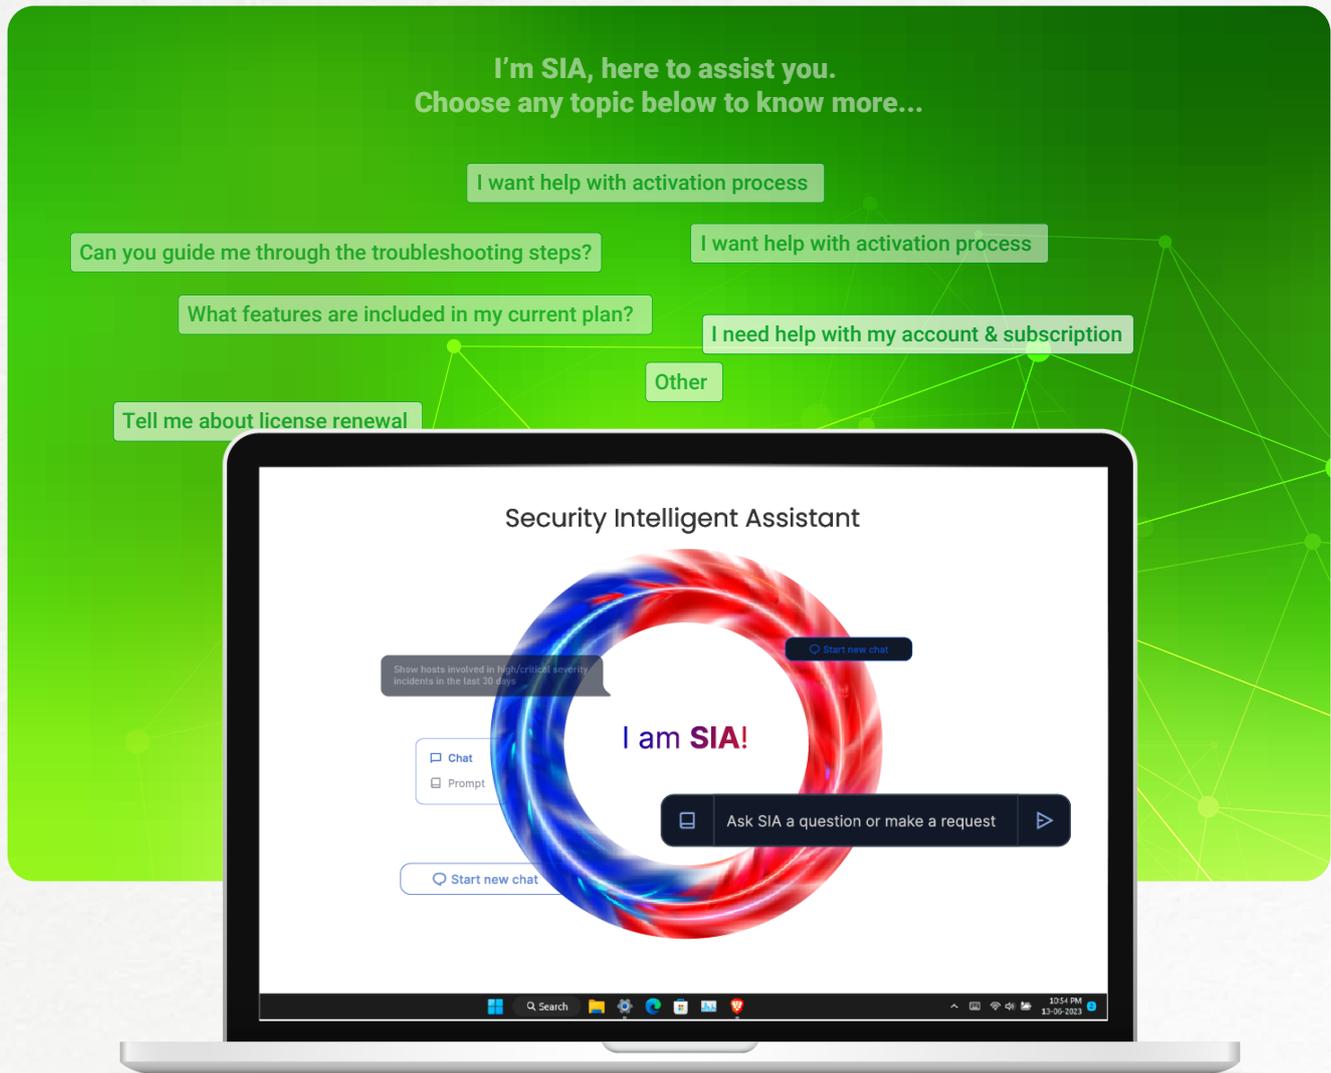

GoDeep.AI is a cutting-edge malware-hunting technology powered by Artificial Intelligence.

Our **Deep Learning** Module learns and remembers every historical malware threat and stores the learnings in a centralized cloud. It feeds the **Artificial Intelligence algorithm** to learn and evolve in real-time, providing the engine with the capabilities of **Predictive Detection**.

This algorithm works conjointly with **Behavioral Detection technology** that monitors and tracks the activities of each program. This technology further blocks the program immediately if its behavior is found suspicious. GoDeep.AI, with its advanced technology, protects users from threats that have never occurred before **Zero Day attacks**.

We understand that sometimes it is difficult to understand security alerts or fix technical issues, which can make it harder to use all the protection and features to their full potential that Quick Heal provides.

SIA – your Security Assistant for a simpler, stress-free experience.
It provides:

Instant Answers
Step-by-step help for common queries.

Feature Walkthroughs
Easy instructions for using key features.

Problem Solving
Quick fixes for all your issues.

Product Awareness
Recognizes your product version & suggests enhancements.

Human-like Conversations
Friendly, jargon-free explanations.

SIA makes security simple, stress-free, and interactive.

Experience AI powered **Digital Privacy & Safety** with Quick Heal Total Security Multi-Device.

- **Lightweight Performance** with Antivirus that runs silently in the background without slowing down your device.

Product Highlights

SIA (Security Intelligent Assistant)

A built-in chatbot that answers your security queries.

Gives you alerts and fixes in simple, jargon-free language, and step by step walkthrough and solutions. Available 24 X 7.

AntiFraud.AI

Here are the AntiFraud features that provide strong protection against scams and frauds.

Be vigilant against leakage of personal data

Dark Web Monitoring 2.0

- Helps you check if your personal data such as your name, email address, phone no., Adhaar, Banking details etc. has ever been leaked by any websites or hacked online. It also recommends appropriate actions to prevent possible data breach.

Keep trackers of your digital footprints at bay

Spy-Alert

- When you go online, there are trackers that pry on your online footprint and browsing behavior. Trackers use such data to promote marketing or sales, display ads, share or sell personal information to different companies. Spy-Alert blocks the trackers that collect your footprints whenever you browse online.

Surf the Internet safely

Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

Scam Protection

- Detects deceptive and phishing attempts instantly that try to steal your data in disguise. You never fall prey to data phishing.

Stop espionage by webcam

Webcam Protection

- Detects and prevents applications and malwares from accessing the webcam of your PC without your consent to compromise your privacy.

Pay bills, transfer money online, and do banking without fear

Safe Banking

- Protects your credentials including bank account, username, and password during banking transactions and online shopping from getting stolen.

Intuitive Workflows and Reports

- Get real time, easy-to-understand visual snapshots of your digital wellbeing reports, along with recommendations to improve your digital safety and online privacy.

meta Protect

One login. All devices. Protection simplified

- Get a synchronized security experience across all your devices with our cloud platform.
- Map your family's devices to a single metaProtect account to manage your device security remotely and in real-time.
- Access a holistic view of your device security, privacy, and receive instant breach alerts.
- Centrally manage licensing, including renewals and upgrades, for added convenience.

Digital Safety Made Easy

Security Score

- Provides insight on your risk situation and security status along with helpful tips for enhancing device security.

Privacy Score

- Offers insights into your personal data risks and gives useful tips to strengthen and protect your privacy and identity in the digital world.

Stay protected with robust scan engine

Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal your data.

Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to infect your PC from various sources and removes them instantly.

Prevent ransomware attempts

Ransomware Protection

- Takes a backup of your data on regular basis, so if there is any ransomware attack, you can remove ransomware and restore your data without getting affected.

Suppress distraction and concentrate on games

Game Booster

- Allows you to enjoy playing games on PC smoothly and faster without any interruptions from other applications.

Restrict inappropriate websites for your children

Smart Parenting

- Makes Internet a healthy platform for your children. Regulates your children's access to the Internet and blocks websites and apps with them from online threats. Their safety is in your hands.
